

Press release – 21 December 2017 - Montigny Le Bretonneux, France

Bertin Technologies acquires Winlight to strengthen its portfolio of optical instrumentation and systems

Winlight, a French company specialized in the design and manufacture of components and systems for high-performance optics, will consolidate Bertin's position in the Big Science industry

21 December 2017. Bertin Technologies, a CNIM subsidiary, announced its acquisition of 100% of the capital of Winlight System Finance, previously owned by its founders Philippe Godefroy and Daniel Soler along with Sofipaca, a Crédit Agricole subsidiary. For this transaction, Winlight was advised by the Aristeia consulting company. Winlight mainly operates in the Astronomy, Big Science, Space and Defense industries. It has world-class state-of-the art technical expertise in the design and manufacture of high-performance optical systems. Notably, the company has unique know-how in polishing technologies (molecular adhesion and precision optical polishing) and in assembly and testing.

Winlight is headquartered close to the Bertin Technologies site in Aix-en-Provence, a center of excellence for the development of instrumentation systems and products.

This operation strengthens CNIM's and Bertin Technologies' product portfolio of **high-performance mechanical and optical systems used in the Big Science industry** (research reactors, synchrotrons and telescopes) and in major defense and space programs by customers in Europe, the USA and Asia.

Following the acquisition of Saphymo in 2015, the French leader of nuclear instrumentation, and the acquisition of the Swedish company Exensor in July 2017, the acquisition of Winlight further consolidates the position of Bertin Technologies among the world leaders of **high-technology sensors and instrumentation systems**.

Philippe Demigné, Chairman of Bertin Technologies, expressed his satisfaction with this transaction: *"We are delighted to support Winlight in pursuing its development and to generate new synergies between our teams and product portfolios. This acquisition strengthens our position and our industrial excellence in the big science, defense and space industries."*

Press release – 21 December 2017 - Montigny Le Bretonneux, France

Philippe Godefroy and Daniel Soler welcomed this transaction: *“Joining Bertin, a subsidiary of the CNIM group, gives us the opportunity to continue our growth in a context of high demand for big science instruments in particular. We are very enthusiastic at the idea of developing synergies between our two companies for the benefit of our customers, the group and our personnel.”*

Founded in 2001, Winlight achieved revenue of €6.1 million in 2016, has a substantial order book and employs 40 highly-qualified people.

ABOUT BERTIN TECHNOLOGIES

BERTIN TECHNOLOGIES, subsidiary of CNIM Group, relies on its long history of innovation to develop, produce and market innovative systems and equipment worldwide. With close to €96M in turnover and 700 employees in 2016, of which 2/3rd are engineers and high-level managers, the group works in four major fields: systems and instrumentation, consulting and engineering, information technology, pharmaceuticals and biotech. Its systems development portfolio is represented through the **Bertin Systems** brand. Based in Paris region, the group is highly active worldwide.

A CNIM GROUP COMPANY

CNIM designs and manufactures turnkey industrial solutions with high technological content and provides expertise, services and operating capability in areas related to the Environment, Energy, Defense and High Tech Industries. CNIM runs projects and markets equipment throughout the world. CNIM is backed by a stable family shareholding that guarantees its development. The Group employs 2,500 members of staff and had revenues in 2016 of €539.9 million, 54.6% of which was for export. CNIM is listed on the Euronext Paris stock exchange.
